

Anthrax Update – Saskatchewan 2006

| | | | | |
|---|--|--|---|---|
| Date: July 28, 2006 | | Time: 08:00 MST | | |
| # Premises Quarantined¹: 75 Cattle: 58 Horse: 2 Swine: 1 Bison: 8 WTD: 1 Cattle/horse: 1 Cattle/ovine: 1 Ovine: 2 Caprine: 1 1 quarantine removed | | # of owners of the quarantined¹ premises: 69 4 owners have 2 quarantines 1 owner has 3 quarantines | | # Premises – not quarantined - samples submitted to laboratory 14 |
| # positive premises²: 74 Cattle: 56 Horse: 1 Swine: 1 Bison: 9 WTD: 1 Cattle/horse: 1 Cattle/ovine: 2 Ovine: 2 Caprine: 1 | | # quarantined premises test results pending³: 0 Cattle: 0 Horse: 0 Swine: 0 Bison: 0 WTD: 0 Cattle/horse: 0 | # premises test results pending⁴ at PDS 10 | # quarantined premises with negative culture results⁴ 2 Anthrax can not be ruled out on these premises – samples may have been unsuitable for testing – vaccination done. |
| Total Mortality⁵ to date: 353 # on positive premises : 350 # on premises under test: - 0 # on premises tested negative: 3 (Evenson, Alton) | | Total Mortality on positive premises by species: Cattle: - 236 Horse: - 5 Swine: - 1 Ovine: - 14 Bison: - 82 WTD: - 10 Caprine - 2 | | |
| % Carcasses disposed of: Burn = 245 (69%) Bury = 50 (14%) Pending/Inaccessible = 58 (16%) | | | | |
| RM's involved to date: | | | | |
| Kinistino 459: - 22 premises mortality : Cattle: 87 Horse: 4 Swine: 1 Bison: 3 WTD: Ovine: 4 | | | | |
| Willow Creek 458: - 18 premises mortality : Cattle: 43 Horse: 1 Swine: Bison: WTD: 10 Ovine: 1 | | | | |
| See next page for more RM data | | | | |
| Spalding: 368: 1 premises mortality : Cattle: 11 Horse: Swine: Bison: WTD: | | | | |
| St. Peter: 369: 1 premises mortality : Cattle: Horse: Swine: Bison: 10 WTD: | | | | |

¹ Declared to be an Infected Place where a Premises is defined by the legal land description Quarter Section-Township-Range-Meridian

² Positive results received from either Provincial or Federal Lab

³ Samples at either Provincial or Federal Lab for testing – where a Declaration of Infected Place is in effect

⁴ Samples at either Provincial or Federal Lab for testing – where a Declaration of Infected Place is not in effect

⁵ Includes 3 animals from two premises at the start of the outbreak that subsequently were culture negative, and 4 animals from 4 premises that have been subsequently tested, but are inconclusive in results – can not rule out anthrax as samples may have been too autolysed to culture live *bacillus anthracis*.
