Stock Person's SCHOOL

May 8, 2003
Saskatoon

Farm Animal Council of Saskatchewan Inc.

Stock Person's S C H O O L

May 8, 2003

Room 2302, WCVM
University of Saskatchewan
Saskatoon, SK

*Presented by the Farm Animal Council of
Saskatchewan Inc. together with the University of
Saskatchewan.*

The objective of this one-day school is to address specific issues, relevant to pasture riders and cattle producers, which will improve their knowledge and performance level. This unique one-day school will provide interactive opportunities for participants to learn from industry experts. Attendees will benefit from a range of topics from cattle handling to identifying illnesses and their treatment.

Along with the many experts who will be speaking on behalf of the University of Saskatchewan, we are pleased to present Dr. Temple Grandin as our Guest Speaker. Dr. Grandin is a designer of livestock handling facilities and an Associate Professor of Animal Science at Colorado State University. Facilities she has designed are located in the United States, Canada, Europe, Mexico, Australia, New Zealand, and other countries. In North America, almost half of the cattle are handled in a center track restrainer system that she designed for meat plants. Curved chute and race systems she has designed for cattle are used worldwide and her writings on the flight zone and other principles of grazing animal behavior have helped many people to reduce stress on their animals during handling.

She has also developed an objective scoring system for assessing handling of cattle and pigs at meat plants. This scoring system is being used by many large corporations to improve animal welfare. Other areas of research are: cattle temperament, environmental enrichment for pigs, reducing dark cutters and bruises, bull fertility, training procedures, and effective stunning methods for cattle and pigs at meat plants.

Pleased to be a part of the 2003 Stock Person's School, Dr. Grandin will share with us information relevant to the low stress handling of cattle while out on pasture.

Agenda

7:30 a.m. - 8:30 a.m.
Registration

8:30 a.m. - 9:30 a.m.
Cattle Handling on the Range
Dr. Temple Grandin, Colorado State
University
